Whether I "pay" for my radio by purchasing advertised products or send a check directly should have no bearing on what I should be able to hear. Please do not accept the National Association of Broadcaster's Petition 04-160 to limit the quality, quantity, and service of radio broadcasting I want to listen to on XM Satellite Radio. I should be entitled to hear the same style (and many more) of programming available on so-called "free" radio. I want traffic and weather reportson MY radio too. Thank you.
